Gentle, conformable and comfortable

...ensuring patient comfort

Pain is a common feature of wounds and may not be attributed to the wound itself. Dressing removal, cleansing, inappropriate dressing selection and debridement can each contribute to wound-related pain.

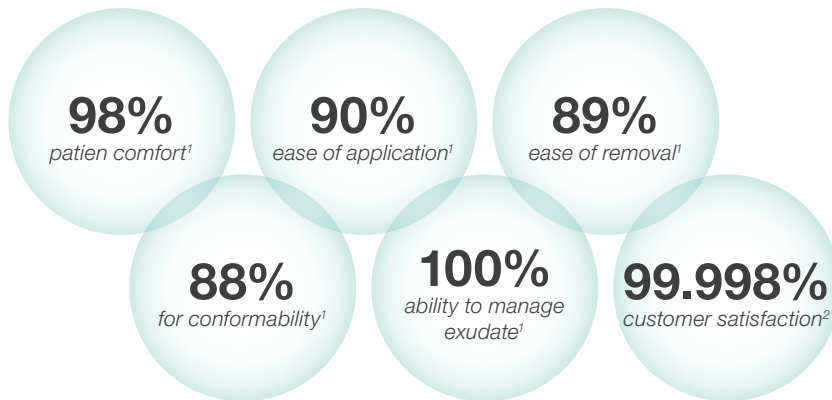

When you need a gentle, comfortable product for your patient, Kliniderm® foam silicone dressings provide a solution.

*only applicable to Kliniderm® foam silicone border

Kliniderm® is clinically effective

Kliniderm® foam silicone is a fast growing brand, providing a comfortable and gentle choice for patients. Clinical evidence on trauma wounds, pressure ulcers and surgical wounds have shown Kliniderm® foam silicone dressings provide:

The results of a skin tear treatment audit of 4 dressings in a home care situation showed that Kliniderm® foam silicone bandages³:

The vast majority of patients rated Kliniderm® foam silicone as comfortable
