

Klinion® **fixation plaster rolls**

Gentle to the skin • Stretchable • Reliable Fixation

Klinion® fixation plaster rolls

Klinion® is a well-known Dutch brand that has been in the wound care market for over 100 years. With a wide range, Klinion® products ensure optimal user comfort. Every day we strive to support healthcare professionals in providing the right care and to keep healthcare affordable. The Klinion® products are unique because of the right combination of functionality, quality and affordable pricing.

The Klinion® fixation plaster rolls range offers a practical and versatile solution for fixation of wound care dressings. Three distinct ranges with unique features and benefits are designed to provide healthcare professionals greater flexibility and choice during wound care treatment. The rolls can be easily cut to the required length and are available in a variety of width options to be easily tailored to different type of wounds.

Indications for use

Non-sterile, latex free plasters for fixating wound dressings, catheters and drains.

Kliniderm® film roll

Transparent film dressing on a roll - Waterproof & breathable

The non-sterile, semi-permeable film dressing offers a waterproof barrier against external contaminants, including bacteria, blood, and body fluids, helping to reduce the risk of infection. Designed to maintain a moist wound healing environment due to the high Moisture vapour transmission rate (MVTR). Its versatility makes it ideal for both home care and hospital use, offering ease of application, durability, and enhanced patient comfort.

Transparent film

The clear design allows inspection of the skin surrounding the wound

Waterproof

Allows the patient to shower

Barrier function

Provides a barrier to keep water, bacteria and contaminants away

Breathable

The film allows excess moisture to pass through due to the high MVTR

Kliniplast® fix sensitive

Soft silicone coated plaster roll - Gentle to the skin

Kliniplast® fix sensitive plaster is designed using a soft silicone coating to provide additional care to sensitive and fragile skin, offering gentle adhesion without causing irritation or discomfort. The Kliniplast® fix sensitive range is particularly suitable for babies, geriatric patients and patients with delicate or treated skin. The carefully selected breathable material together with the soft silicone coating ensure a pain-free removal and minimal harm to the delicate skin.

Gentle on sensitive skin

The silicone coating provides a soft contact with the skin, being gentle during use and causing low discomfort at removal making it ideal for babies and geriatric patients

Soft and breathable material

Carefully selected material is soft, breathable and pleasant to the skin allowing a comfortable wear throughout the day

Skin-friendly

Designed to minimize the risk of irritation and allergic reactions, the latex-free plaster provides a good compatibility due to the silicone coating

Easy to remove or reposition

The silicone coating allows healthcare professionals to easily remove or reposition the plaster after a wound area inspection

Kliniplast® fix stretch

Stretchable plaster roll - Reliable & secure

Kliniplast® fix stretch is ideal for a reliable fixation of large wound dressings, catheters, drains offering a secure hold without restricting movement. Its highly stretchable material makes it suitable for wounds on highly mobile areas of the body, ensuring both comfort and firm fixation. Kliniplast® fix stretch provides versatile and budget friendly solutions for a wide range of wound varieties..

Reliable fixation

Strong and reliable fixation provides a secure hold and reduces the need for frequent reapplications

Ideal for moving body parts

Stretching properties of the material allow for good adjustment and flexibility to moving body parts

Skin-friendly

Designed using latex free, soft material and skin friendly adhesive to minimize skin irritation

Barrier protection

Selected material is strong, stretchable and water-repellent providing a flexible barrier against external contaminants
